SUBJECT INDEX

ABM treaty 124
Abortion, and the US Bill of Rights 359
Academic freedom 105
  in England 105
  and World Archaeological Congress 184
Academic research, social rate of return on 348
Active specific immunotherapy (ASI) 291
  studies in animal models 296, 298
  chemical studies of 300
Adjustable spanner 129
Administration, and science 342
  for scientific research 304
  as threat to working scientists 352
Adoptive immunotherapy studies 296, 298
Aerial photography, exploitation of 16
  periodic 18
  and synoptic observations 17
  and toxic waste disposal 17
Aerial reconnaissance, serendipity effect of 16
Agents for change, interdisciplinary 340
Agriculture, and science 1
  and tiger 48
AIDS epidemic, US Constitutional implications of 359
Alchemists 385
Alchemy, and Aristotelian principles 376
  and Bosch 375
  as fossil science 375
  in literature 386
Alternative energy sources, and cancer risk 241
Alternative fuel for road vehicles 365
Andromeda galaxy 152
Animal behaviour 166
Animal model, for cancer 291
Animals, cancer in 205
  in research 352
Antarctic research, and military 345
Antarctica, and Greenpeace 185
Anthropic reasoning, and origin of Universe 157
Antiquity, decline and fall of 12
Apfelstrudel, by microwave 187
Archaeology, and aerial reconnaissance 17, 23
  politicisation of 184
  from space 26
  and zinc production in ancient India 86
Art, and botany 404
  science in 374
  and science 2
  in 17th century 379
Art history, aims of 375
  and history of science 375
  and science 410
Artificial intelligence, in biosciences 232
  and Turing Institute 117

ASI. *See* Active specific immunotherapy
Astronomer, reminiscences of 183
Astronomical Society, Royal 188
Astronomy 148
Atomic bomb, foreseen by H. G. Wells 100
Auschwitz, and aerial reconnaissance 18
Australia, and Greenhouse Effect 323
Australian science, history of 409
Australia's bicentennial $10 note 399
Austria, and natural sciences 411
Austria-Hungary, and Industrial Revolution 410
Automobiles, hydrogen fuel for 365

Bacon, Francis, *New Atlantis* and foundation of Royal Society 387, 388
and *Novum Organum* 379
Bailly, David, *Vanitas*, and Baconian scrutiny 380
Balchin, Nigel, and scientists 395
Ballistic missiles, threats of 363
Balzac, and scientists 390
Banknotes, clear plastic for 400
design and manufacture of 399
and optically variable devices 400
synthetic paper for 399
Banks, Joseph 186
Barnett, S. A. 403
Barrow, J. D. 404
Basic research, in Continental Deep Drilling Programme 162
policy for, in FRG 162
Basic science, in universities 140
Beer, nitrosamines in 249
Big bang, evidence for 154
hot 153
Big cats, origin of 43
Bill of Rights, US 360
and new technology 354
Bioengineering 359
Biology, and freedom 403
new 356
and police power 358
Biomedicine, molecular 225
Biosphere, and Greenhouse Effect 324
Biotechnology, industrial-academic partnerships in 130
of silk production 407
Black holes, galactic evolution, and cosmic coincidence 148
and general relativity 150
Blake, William, attacks on science by 390
and Newton 390, 391
Boron, in diamonds 67
Bosch, Hieronymus, and *Garden of Delights* 375, 377
Botany and art 404
Brass, history of 87
at Taxila 88
uses of 87
Brass alloy 87
Breast cancer, clinical results in 284
hormone therapy for 286
prognostic determinants in 285

British Disease 334
Burkitt's lymphoma 207
Bush, George, and Greenhouse Effect 322
and support for science 350

Calcium, and colorectal cancer 256
Camera obscura 379
Cancer 195
in animals 205
chromosomes and genes in 216
curability of 203
cure for 195, 210, 211
diagnostic steps for 264
and environment 203
as genetic disease 216
and green plants for oleochemicals 241
history of 204
'initiation' of 206
latency of 208
multistage development of 206, 217
nature of 203
occupational 204
and viruses 205, 207
Cancer chemotherapy 284
Cancer development, basic concepts of 210
Cancer incidence, in developing countries 254
Cancer information 195
at German Cancer Research Centre 311
by telephone 311
Cancer metastases, immunobiology and immunotherapy of 291
Cancer mortality, in FRG 291
Cancer prevention 210
and human immunodeficiency 259
Cancer registries 255
Cancer research, computational methods in 225
goals of 225
interdisciplinary 195
Cancer screening, success of 264
Cancer therapy. *See also* Chemotherapy 196
Carbon dioxide emissions, sources of 325
Carcinogenesis, chemical, multistage 233
concepts of 203
and physiologic unresponsiveness 259
two-stage 233
viral 209
Carcinogens, environmental N-nitroso 248
Carter, Harold B. 186
Casti, John, and catastrophe theory 5
Catastrophe theory, and social processes 4
Cell surface molecules 223
Chaco peccary. *See* Tagua
Chaco region, in Paraguay 144
Chaucer, and alchemists 386
Chemical carcinogenesis 233
Chemical elements, naming 135
in Solar System 149

Chemist, essential language of 136
Chemistry, and banknote forgery 399
vocabulary of 133
Chemotherapy, for cancer 284
new drug development and 286
China, silk in ancient 406
tigers in 49
Cholera 196
Chromosomes and genes in cancer 216
CIA, and aerial reconnaissance 21
Civil engineering 29
Civil liberties, and science and technology 354
Clarke, Arthur C., and *Imperial Earth* 98
Cless-Bernet, T. 187
CO_2 increase, and Greenhouse Effect 321
CO_2 problem, and future of hydrogen-powered vehicles 372
Coal tar, and cancer 233
Coates, Vary 98
Colorectal cancers 254
aetiology of 255
early detection of 257
epidemiology of 254
incidence of 254
and positron emission tomography 273
Communication, by honey-bees 166
in universities 108
Communications, government regulation of 357
and science 2
Computed tomography (CT) 264
Computer-aided molecular structure and function analysis 230
Computer-aided sequence analysis, in cancer research 229
Computers, and freedom 3
Conan Doyle, Arthur, and scientists 394
Consensus, in science 172
Conservation of energy, and Greenhouse Effect 323
Constitution, US. *See* US Constitution
Continental Deep Drilling Programme, in FRG 162
Continuous diffusion processes 7
Controversy, resolution of scientific 174
Cooking, microwave 187
and science 408
Coral, and Greenhouse Effect 325
Cosmology, and Einstein 151
Counterfeiting, of Australian $10 note 399
Creativity 410
defined 411
democratisation of 410
Crime, and science 2, 399
Croton oil, and cancer 233
Cuban Missile Crisis, and aerial reconnaissance 21
Culture, mathematics as 120
and science 2

Cytokines, and lymphocyte growth 221
Cytoskeleton 278
Cytotoxic T lymphocytes (CTL) 292
tumour-specific 293

Daimler-Benz Company, and hydrogen-powered vehicles 328
Dance, honey-bee 166
Dark matter, and galaxies 154
Deforestation, of Chaco 145
and Greenhouse Effect 324
Delta Project, in Rhine-Maas-Scheldt delta 29
Deutsche Forschungsgemeinschaft 110
Deutsches Krebsforschungszentrum. *See* German Cancer Research Centre
Devil's Doctrine 396
Diamonds, history of 64
impurities in 64
industrial uses of 73
in literature 64
in science 64
thermal conductivity of 68
Diamond anvils 71
Diamond heat sinks 68
Diamond scalpels 70
Diet, and colorectal cancer 255
Dimbleby Lectures 143
Directed-energy weapons. *See also* Strategic defense initiative
cost of 363
future of 364
Disasters, prediction of 26
research on 181
responses to 181
and science 3
Discontinuity, social 4
sociological concept of 5
Disease research, classical approach to 195
Djerassi, C., short stories by 408
DNA, and cancer 216, 225
DNA analysis, and Fourth Amendment 355
DNA typing 361
Drabek, Thomas E. 181

Ecology, of galaxy 150
and macro-engineering 31
Economic collapse, and social discontinuity 13
Economic development, and science parks 54
and tigers 53
Economic growth, and science 341
Economic theory, and human behaviour 403
Edgerton, Samuel Y., Jr 410
Education, expansion of 107
and science 2
for science 142
of scientists and engineers 343
and tigers 50
Educational system, US 352
Electronic bracelets 358, 361
Eliot, George, and scientists, in *Middlemarch* 392
Embryo research, and US Constitution 359
Energy, geothermal 325
from plants, and cancer risk 241
and science 2
tidal 326
from wind 326
Energy conservation, and Greenhouse Effect 323
Energy sources, alternative 325
and cancer risk 241
renewable 325
Engineering, and global warming 321
Engineers, and industrial success 339
England, decline of science in 139
Environment, and cancer 203
colorectal 255
global, and defence forces 345
and hydraulic engineering 32
Environmental damage, defence against 345
Environmental N-nitroso carcinogens 248
Epidemiology, of cancer 203
Epstein-Barr virus, and cancer 205, 207, 208
Estuarine ecosystem, and macro-engineering 29
Ethics, and logic 143
Ethology 403
Euphorbiaceae, energy from. *See also* Spurge 241
European Community, cancer study in 256
